

PERFECT TOOLS FOR SHOP-FLOOR ENVIRONMENTS

Today's quality control teams need portable dimensional inspection solutions that offer the same accuracy, reliability and repeatability as measurement technologies found in metrology labs. Standalone or bundled, the Creaform Portable Workstation and the C-Track Shop-Floor Stand improve the productivity, versatility and overall quality control processes—directly on manufacturers' shop floor.

PORTABLE WORKSTATION

Creaform's Portable Workstation comes in an all-in-one carrying case. Quick to set up and connect, it offers users a comfortable, ergonomic working height. It's ideal for all your shop-floor inspection needs.

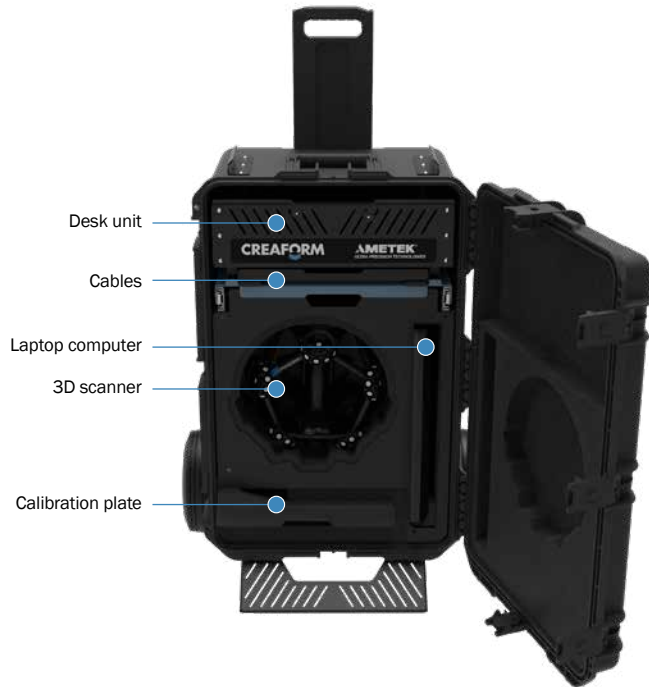

C-TRACK SHOP-FLOOR STAND

Thanks to its quick-connect C-Track plate and simple setup controller, you can go from the box to the stand in no time flat. Use the C-Track Shop-Floor Stand to easily move around the part while inspecting—whether in the lab or on the shop floor. Thanks to the hot-swappable Self-Power Kit, you can operate your 3D device without needing any external, cumbersome wiring or when electricity is not available.
